SUBJECT: BLUE LANTERN PRE-LICENSE END USE CHECK ON
APPLICATION 05-050103848

¶1. This is an action message. See paragraphs 2-4.

¶2. The Department's Office of Defense Trade Controls Compliance (PM/DTCC) requests post assistance in conducting a pre-license check for the export of power modules to Ukraine via Russia. Post is requested to complete this Blue Lantern check within 30 days. Lack of response to a Blue Lantern check will affect pending and future licenses involving parties to this license.

¶3. Reason for request: license application documents indicate that the requested components are to be incorporated into a static converter for use on an AN-70 transport aircraft. These documents, however, do not specify the final end-user of the aircraft. The power modules are United States Munitions List (USML) commodities. Restrictions of the Arms Export Control Act (AECA) prohibits the re-transfer or re-export of USML commodities without express USG authorization.

¶4. ACTION: Please contact the Foreign Consignee, Aviant State Aviation Plant, and the Foreign End User, ASTC ANTONOV. Ask each company to explain the end use of the static converter that will contain the USML components. Will this static converter be used in a single AN-70, or for testing purposes on several aircraft? If the static converter is intended for permanent installation on one AN-70, who will be the ultimate end-user of this particular aircraft? Ask Aviant and Antonov if they understand the restrictions on USML commodities, and the prohibition against re-transfer or re-export without express USG authorization. END ACTION.
